

Water Conservation Measures Rebate Guidelines

To assist the public in conserving water as part of the implementation of the new metered billing system, Council has approved the provision of rebates for the purchase of certain water conservation items.

- These items and the amount of the rebate are as follows:

<ul style="list-style-type: none"> • Low Flow or Dual Flush Toilets • Low Flow Showerheads • Rain Barrel – 200 to 400 litre • Sprinkler System Smart Controller * 	\$70.00 \$5.00 \$30.00 \$125.00
* (Installed by a CIT certified and licensed contractor only)	

- These items must have been purchased after January 1, 2009 to be eligible for a rebate.
- Only property owners on municipal water are eligible to obtain a rebate. Applicants must complete the appropriate form and include a copy of their driver's license or tax bill indicating that they own property in Wasaga Beach. Town staff will confirm that the applicant is on municipal water.
- Applicants must also provide copies of the receipts and packaging indicating that they purchased the particular item. In the case of the Sprinkler System **Smart Controller** they must include with the receipt a copy of a certificate/invoice indicating that it has been installed by a **CIT** certified and licensed contractor.
- Applicants will not receive a rebate cheque; rather they will be credited with the amount on their next water bill. This is important to note and has been written in bold just above where the person is to sign on the application form.
- Applicants are asked to complete the form and staple all the supporting material together with the form and bring it to the Town Hall or Public Works Office for consideration. They will forward completed forms to the Water/Sewer Clerk for processing.

If you have any questions, please feel free to contact Jim McIntosh, Director of Public Works.
