

**TOWN OF WASAGA BEACH
WATER METER REPLACEMENT PROGRAM
PHASE III**

To date approximately 7000 water meters have been replaced in homes/cottages (Phase I) throughout the Town and we thank these residents for their cooperation. In addition the installation of commercial meters (Phase II) has been initiated and will be completed by August 29,2008.

For those residents and commercial owners that have not yet had their meters replaced or installed please make an appointment by contacting the contractor directly during normal business hours by phone (705) 428-2668 or by e-mail watermeters@solomoninc.ca. After hours and Saturday appointments are available at your request.

Phase III of the program involves the installation of transmitters on the outside of every home/cottage and commercial building. The transmitters will be placed over the already installed touch pads usually located near the hydro meter. A team of installers will be working throughout the summer . There is NO need to make any appointments for this phase of the work as there is no need to enter any building. The installers will carry photo ID.
