Sept. 2, 2020

Main Street Bridge project resumes after Labour Day

Wasaga Beach – The Main Street Bridge rehabilitation project will resume after the Labour Day weekend on Tuesday, Sept. 8.

The project started in the summer of 2019 with the two-lane bridge, which spans the Nottawasaga River, going to one-lane and the introduction of signals to control traffic. For the summer of 2020, the bridge reverted to two-lanes in order to accommodate visitor traffic.

With construction starting again, the bridge will return to a single-lane signalized route. The single-lane will continue until the project is complete in June 2021.

We remind motorists to expect delays and obey the traffic signals.

Background

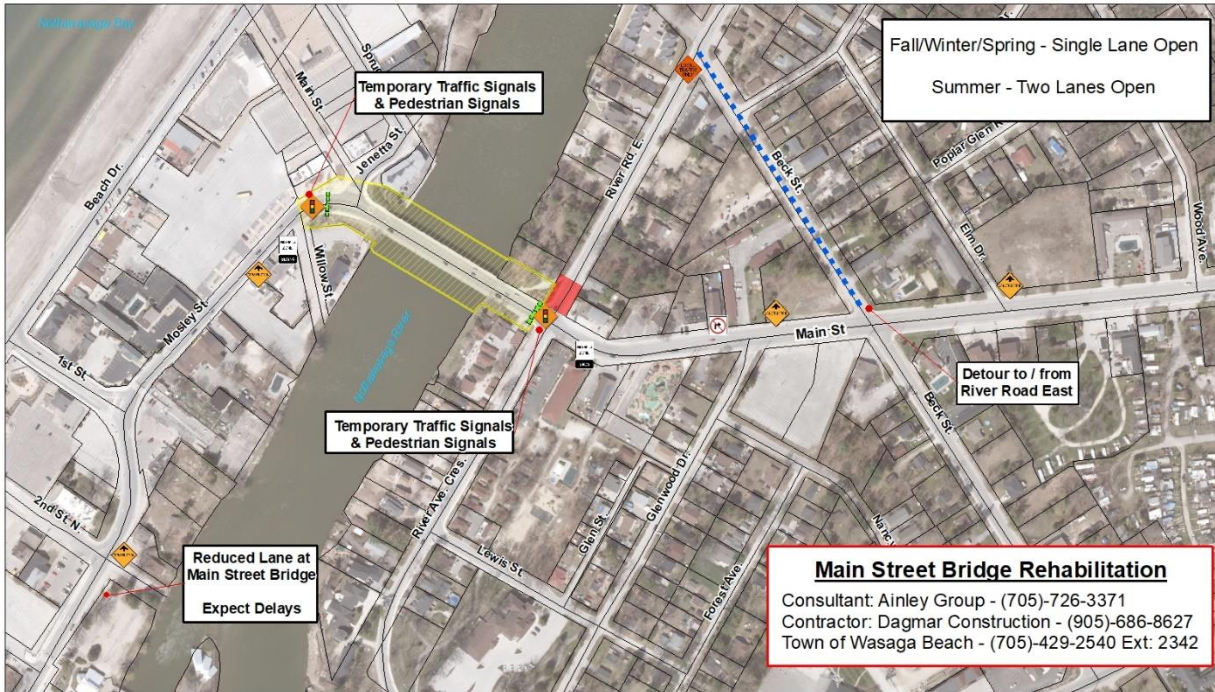

- The town is investing \$6.1-million in the project.
- In July 2019, council awarded the project tender to Dagmar Construction, the same firm that refurbished the Schoonertown Bridge.
- The Main Street Bridge was constructed around 1960.
- The scope of the rehabilitation work includes patching, waterproofing, paving of the concrete deck, refacing and widening sidewalks, upgrading concrete abutments, as well as new street and navigation lighting.

Main Street Bridge Rehabilitation
Town of Wasaga Beach

- Temporary Crosswalk
- Detour
- Construction Zone
- Road Closed
